

You: what is the problem statement for the dairy supply?

Bot: Based on the excerpts from page 3, the problems and their corresponding statements for dairy product logistics are:

- \* \*\*Manual crate & SKU counting:\*\* Prone to errors, slow process, time-consuming, and miscounts lead to supply chain losses.
- \* \*\*Inefficient vehicle loading/unloading:\*\* Delays in distribution.
- \* \*\*Existing systems struggle with high volumes:\*\* Limited scalability.

You: how the pilot deployment project offer for the crate counts

Bot: Based on the excerpts, the pilot deployment involves starting to test the system in a real factory environment (Page 9).
